Your mission is to destroy as many geometric shapes as possible before time runs out. As the shapes you can destroy spawn rapidly, your time to attack will decrease. The shapes can be rotated and zoomed, you can create bridges and a destructor to destroy the shapes, but you can also destroy the shapes directly. Try to keep a high score to win. Awesome physics-based puzzle game that takes players to the magical world of shapes and forces them to make creative and creative moves, resulting in satisfying gameplay. In Destroy Geometric Shapes you can turn shapes to your advantage. A short time before they are destroyed, you can place shapes on top of them. This makes it much easier to destroy them without a bridge. Use your moves to cover the remaining shapes and create bridges. However, if you have used up your time, you must get out of the way of the shapes before they turn into a huge piece of junk that you will have no control over. In this game you get to test your brain and get the satisfaction of being smarter than the previous level. You start off easy by rotating the pattern, then some of the shapes get moved off, but there's always something you can do to keep the pattern going. Destroy a great puzzle game. I highly recommend this puzzle game to people that like puzzle games. It's a game for everyone including kids and adults. It's a game that I myself really enjoy playing. I think that if you are looking for a game that requires you to think, this is the game for you. p.s. Check out other cool games made by the developer. #53 Rating: Cake are 4 men, who get money through paper routes, and they play their cake cars to the pub. The pub is 100 miles away from home, so they have to drive the cars

Romans don't take too kindly to the Brits and Celtic culture in Britannia. As such, they've set out to conquer it by playing the ancient romancing game of Britannia. This game includes maps set in ancient Britain as well as in Imperial Rome, and grants an exciting variety of military, social, political and military-historical challenges. Each match includes multiple objectives you can win thanks to a mix of glory options and time limits.

Teamplay is present in the game as well as the dynamic action point system.

Key Features:

- Fun racing game where the racers don't even have to look at the cars' speedometer!
- A free-roaming, team-based game where chariots can be captured.

-
- A sequel to Lít Erotiani to highlight the diversity and beauty of ancient Celtic culture.
 - 3 teams of 12 chariots. 12 players can play in 2 teams.
 - Players have the chance to win trophies, place in the rankings of the best teams, and go up against each other to win glory.

Requirement: - iOS 7.0 or higher - iPhone 5 or higher

About Pacoh: Pacoh is a 25 year old cartoonist and illustrator from a small town in New Mexico. Inspired by the early 80's cartoons and love for analog gaming, Pacoh created an independent platform game about the best moments of life: finding the peace of mind and escaping from the stress of reality. Pacoh has been really concerned about the open source principles. His games are free, and he doesn't even take a cent out of it to survive. What the "don't like it" button does is force you to complete the tutorial before downloading the game. It should get you up to speed very quickly. If not... well, download it and see if it works on your device. Version one runs great on my

iPhone 5 and my old iPad so I do recommend this game to you. You can also download version one to your desktop and play it on your Mac or PC. 1-7-2015 My compliments to the developer to continue the series in a free version. A most commendable work! Version one is a complete game, though there are no ads and it's free. If you want all the extra content, like multilanguage and added features then you can purchase it. You can also download version one to c9d1549cdd

What's new:

2.0 (Free) This is the first version of Chess. Wherever you go, it'll be tough to not lose at some point. By creating something as complex as chess, we've allowed you to tell your stories in a way which is out of reach to other block-based social games. But while Chess's longevity has been one of the game's greatest strengths, the convenience of playing someone else's story-game has left it feeling a bit lonely. All of the new connecting social features in MC—which make it easier to get started, stay connected, and learn from each other—are fully integrated into Chess. That's why the best thing Chess players can do is just play Chess, wherever they go. Join millions of players, all across the globe. Keep playing Chess with whoever you always want to play. Keep following your friends' Chess stories, no matter where they go. Become the flagbearer for adventure across all the connected Chess games. Wish you could bring Chess across all screens and platforms. At some point you'll want to bring Chess to devices you may not have, such as Apple TV, or a Playstation. We're here to help with that. We hear you. Search for the best Chess 3D, 3D Chess, Chess Strategy, Chess Game, Chess VR, Chess Tables, and Chess Controllers. Steps to Install Chess Multiple Boards Step 1: Mac App Store, or drag the Chess Multiple Boards.dmg file directly to Applications folder. Step 2: Open Chess Multiple Boards, enter your password, if prompted, and play. We'd love to make Chess Multiple Boards easier to run, and your feedback on this is always welcome! You can contact us at support@cocosgames.com. Switch Localizations The first version of Chess arrived in your Mac App Store with English and French as the default localization. We loved hearing about your success at bringing Chess to new peoples, so we've listened to your feedback and updated your English localization with

German, Polish, Portuguese, Russian, and Dutch. That's right, and we've even added more languages in total. Keep up with the updates to your chosen localization. Look for your changelog in the ellipses

Welcome to Moreytown is an interactive text-based fiction novel that asks you to play a variety of roles within the community of furry, anthropomorphic mammals. The novel features thirteen playable species, including tiger, capybara, bear, wolf, fox, deer, otter, cougar, lion, cat, and others. Each species has its own unique abilities and dialogue, and the situations that you face will determine the traits of your character, from your appearance to your personality. From puppies to teenagers, the possibilities are endless, and the decisions you make in your relationships will shape the future of your town. At the same time, the story plays out across multiple paths, giving you the opportunity to experience the narrative several different ways. Each story can and will change as you progress, so prepare to take your role and plot in unexpected ways. Your choices are varied and instantaneous, with different actions rewarding you differently. Admittedly, this was a difficult experience to develop, given the previous two generations of interactive fiction have been firmly rooted in set path-based puzzle-solving. This is a game that involves decision-making in a vastly different way, which required a lot of iteration before we arrived at a game design that felt solid, and also something that we were willing to undertake.
