strings within the comma-separated list of strings I have a List which I have populated using a CSV file. ['Jardim de Botas, R. Damasceno, 77', 'Escola de Riqueza, Avenida Rebouças, 78'] I want to extract the numbers after the comma separator to a List but am unable to write the expression. Any help would be much appreciated. A: You can use Regex to find the matching part of your string. This regex uses lookahead and lookbehind which creates a pattern that you can refer to later. \[(?=[0-9]+)#(?=[0-9])\]

The continuous chip test disclosed in JP-A No. 4-343183 provides that a signal (weak signal) to be tested is amplified by a test amplifier, the amplified signal is supplied to a comparator, and the comparator outputs an ON/OFF signal. With the chip test described above, the weak signal is reduced in amplitude by attenuating the signal for the test amplifier. In this case, however,

there arises a problem that the signal for the comparator cannot be completely attenuated, failing to prevent a fault such as a short circuit which should be detected.

Does anyone know how to make the PDF open in read mode instead of edit mode? There is some kind of a password on it, but it's not a standard password lock either. A: For PDFs embedded in websites, you can use the Adobe Acrobat Reader DC to open them in read-only mode, which also allows you to use it as a PDF viewer. You'll need to install the Adobe Acrobat Reader DC free. As you didn't say you've installed Acrobat reader, I'm assuming it's already installed. If not, you can install it in the Windows App Store. To open PDFs embedded in websites with the Adobe Acrobat Reader DC, go to File > Open, search for "Site File", and select the PDF. You'll then be presented with the File > Open dialog box, as shown in the first image below: If you have Adobe Acrobat Reader DC installed, click the icon and choose "Open using Adobe Acrobat Reader DC (not Open PDF for editing)", as

shown below: If you don't have Adobe Acrobat Reader DC installed, don't worry, you can download it for free from here. When it comes to violence in war, we seem to have divided into two camps. Those in the No camp think that people should just accept violence as an inescapable part of war, and in the case of terrorist wars that just is. Others who accept violence as war agree that under some circumstances violence can be justified, but that in almost all cases it is wrong. One could pick the camp up by the horns and declare that "it's a war, so it's the other side's fault that people get killed" or that "it's the fault of those who resort to violence to get what they want". Of course, all of these positions raise interesting questions, but none are so interesting that they tell us anything new about war. But what if we tried to answer the question: "What would happen if we banned violence in warfare?" One might well think we'd find the answer to be something like WWII-style warfare. Certainly those who think that sometimes violence in war is OK will say that this is the obvious result of banning it. For them, banning violence would only mean that when the opportunity arose, those engaged in violence would just fight back, and that the
